Syeda Daniya Fatima

Full Stack Software Engineer

daniya.fatima@example.com | github.com/daniyafatima | linkedin.com/in/daniyafatima | Remote

SUMMARY

Full Stack Software Engineer building scalable web applications with React, Next.js, Vue.js, Nuxt.js and Python. I craft intuitive user experiences backed by reliable, well-tested systems.

SKILLS

Frontend: React, Next.js, Vue.js 2/3, Nuxt.js, JavaScript, HTML, CSS, Tailwind CSS

Backend: Python, Django, REST APIs

Tools: Git, GitHub, Vercel, Postman, npm, Yarn

Concepts: Composition API, Options API, Responsive Design, Auth, Performance

EXPERIENCE

Full Stack Software Engineer

2023 - Present

- Built responsive web applications and reusable UI component libraries.
- Integrated REST APIs and implemented authentication flows.
- Improved application performance and Core Web Vitals.
- Worked across Vue 2 and Vue 3 with the Composition API.
- Built and shipped applications using React and Next.js.
- Collaborated closely with designers and backend developers.

Frontend Developer

2022 - 2023

- Migrated legacy Options API components to the Composition API.
- Implemented design systems with Tailwind CSS.
- Optimized bundle size and lazy-loaded heavy routes.

SELECTED PROJECTS

Character Management Platform

Vue 3, Nuxt, Python - profiles, uploads, search, tags, auth.

Dating Application

React, Next.js - auth, profiles, responsive design, API integration.

Vue Modernization

Vue 2/3 - Composition API migration maintaining legacy code.
