SUMMARY

Full-Stack Software Engineer with 4+ years of experience building production web applications with Vue.js, Nuxt.js, React and Python. Primary engineer on a large, multi-year client platform for over four years, owning features from requirements to release. Currently expanding into AI engineering, integrating LLMs into production features through the Model Context Protocol (MCP).

SKILLS

Frontend: JavaScript (ES6+), TypeScript, Vue.js, Nuxt.js, React, Next.js, Pinia, Redux, HTML5, CSS3
Backend: Python, Django, Node.js, REST APIs, WebSockets
Databases: PostgreSQL, MySQL, MongoDB
Tools: Git, Docker, Netlify, Jira
AI and Mobile: LLM APIs, Model Context Protocol (MCP), React Native

WORK EXPERIENCE

Software Engineer III Aug 2026 – Present
Lexpool, Remote

- Build LLM-powered product features on the Model Context Protocol (MCP), securely connecting models to external tools and data sources.
- Break down product requirements into clearly scoped technical tasks, bridging product intent and engineering execution.

Software Engineer Mar 2022 – Aug 2026
StaxSol, Lahore (joined as Software Engineering Intern, Mar – May 2022)

- Primary full-stack engineer for a creator community platform with 600K+ monthly visits, ranked in the top 100,000 websites globally (Similarweb), owning features from requirements through release and production support.
- Led the migration from Vue.js to Nuxt.js (server-side rendering, file-based routing) to improve SEO and page-load performance.
- Built real-time, WhatsApp-style chat using WebSockets.
- Built customizable profile pages, content organization (nested folders, tags, search), privacy controls and community features such as comments and follows.
- Designed a Pinia state-management layer for complex, data-heavy workflows.
- Contributed to a separate client product, a mobile dating app built with React Native and a Django backend.
- Built a Python web app that turns basic client details, such as a name and a link, into ready-to-publish social media posts.

PERSONAL PROJECTS

AI Resume Analyzer

- Built a full-stack React and Node.js app that uses an LLM API to analyze resumes and return structured feedback.

HomeBakely: Home Bakery Ordering Platform

- Built a full-stack food-ordering platform in Vue 3 and Python for ordering from home bakers (final-year project).

EDUCATION

Bachelor of Science in Computer Science (BSCS) 2018 – 2022
Kinnaird College for Women University, Lahore
